Houston Area Association for Hospital Engineering

Statement of Purpose

The purpose of the Houston Area Association for Hospital Engineering is to provide a forum for the exchange of information and ideas important to the hospital engineering community in the Houston area. The issues presented by the local environment and the rich hospital community in and around Houston, make it important that the engineers in this community have a common place to share experiences and gain knowledge.

Through regular meetings and periodic events, the HAAHE will provide opportunities to meet and get to know other engineers in the Houston area who are involved in the management of hospital facilities, design and consulting for hospitals, and contracting and equipment services.

The HAAHE community will support itself through educational programs at each of its meetings covering topics important to Houston area hospital operations, design, and construction. Special topics covering the compliance with Joint Commission, and state and codes will be included.

HAAHE will provide support to member's and their organizations through educational outreach programs for operations personnel, upcoming designers, and project supervision.

Membership

Regular membership is open for the benefit of those involved professionally in hospital engineering, design and construction. This includes hospital facility directors, facility engineering managers, employees responsible for environments of care, hospital construction project managers, employees of professional engineering firms, employees of professional construction management firms, healthcare facilities consultants, contractor project managers for hospital projects, and manufacturers and their representative directly involved in design, supply and support of equipment to the hospital environment.

This membership is intended to be limited to those directly involved in or with past history in the management, design, and construction of hospital facilities.
